DESCRIPTORS: *Exterior ballistics, *Rockets,
Stability, Mathematical analysis.

This is an excellent summary primarily of other
people's results of studies on the stability and other
dynamic properties of unguided ballistic rockets. An
excellent bibliography is supplied in the reference list.
It is interesting to note that a good feeling for the
effect of various constraints or control laws can be ob-
tained from perusing the simple examples exhibited in
this paper. (Translator)
